### SUMMARY

As a cloud and Network Engineer, with a passion for automation, I leverage my scriptwriting skills to streamline repetitive tasks, enhancing efficiency and productivity. I design and optimize network infrastructures, ensuring seamless communication and connectivity. My skills extend to Cloud Computing, particularly in Amazon Web Services (AWS) and Microsoft Azure, where I architect, deploy, and manage cloud environments for cloud-native applications. Proficient in network design tools for both on-premises and cloud-based systems, I ensure seamless collaboration and management. Motivated by the pursuit of technological advancements, I thrive on tackling new challenges and uncovering milestones in the ever-evolving landscape of technology.

---

### EXPERIENCE

#### 2024/June – 2024/September

##### Network Infrastructure, Nokia, Nairobi

- I worked as a Nokia Network Infrastructure Engineer.
- Prepared the service routers (SR) for deployment in their initial configuration.
- Lead the IP team in writing scripts for automation in the Service routers.
- Helped in setting up Nokia accounts for daily resource access in eLearning.

#### 2022/November–2023 December

##### Technical support, Spartec Consortium-Africa

- I completed migration of Suntory beverage & food users and computers.
- Perfectly collaborated with remote team to set up new accounts with new custom Suntory beverage & food Image
- I wrote the documentation of the steps migration.

##### Key responsibilities at Nokia

- I worked on software upgrade and license upgrade support.
- I helped in equipment surveillance and operation in the warehouse.
- Network Management with Nokia NSP.

##### Key responsibilities at SCA ltd

- Adding users to the domain, analyze and solve domain related issues.
- Setting up of desktop computers, laptops, and printers for users
- Provide end-user support to customers.

---

### EDUCATION

#### 1. Kibabii University, Bungoma, Kenya Bachelor of Science (Information Technology). December, 2023

- Technology Student Leader in the Academic Year 2022/2023.
- Organized online training for work readiness for students with Partner bodies.

#### 2. Cloud Certified: AWS and Microsoft Trainings May, 2022.

- Trained as a cloud Engineer to become a certified AWS cloud Practitioner, Certified AWS Solution Architect Associate and Azure AI.

#### 3. Network Certified: Network Routing Specialist 1, Nokia September, 2024

- Trained and become a certified Nokia Routing Specialist (NRS1).
- Interacted with docker in running Nokia service router (SROS) network appliances in container labs
