SUMMARY

As a cloud and Network Engineer, with a passion for automation, I leverage my script-writing skills to streamline repetitive tasks, enhancing efficiency and productivity. I design and optimize network infrastructures, ensuring seamless communication and connectivity. My skills extend to Cloud Computing where I architect, deploy, and manage cloud environments for cloud-native applications. Proficient in network design tools for hybrid environments, I ensure seamless collaboration and management. Motivated by the pursuit of technological advancements, I thrive on tackling new challenges and uncovering milestones in the ever-evolving landscape of technology. Currently seeking opportunities where I can apply my skills in cloud infrastructure, network automation, and scalable enterprise solutions.

EXPERIENCE

July/2024 – September/2024

Network Infrastructure, Nokia, Nairobi

- Worked as a Nokia Network Infrastructure Engineer, configuring Nokia Service routers (SROS) and leading automation initiatives.
- Helped in setting up Nokia accounts for daily resource access in e-Learning.
- Created a clear and concise presentation to explain IP concept to management.

Key responsibilities at Nokia

- Supported team members to access technical resources via Nokia E-learning.
- Configured and deployed Nokia service Routers for implementation of IP/MPLS and Layer 2/3 VPNs.

September/2023 – June/2024

Technical support, Spartec Consortium-Africa

- Successfully led the migration of users and computers for Suntory food and beverages, ensuring minimal disruption and seamless transition.
- Collaborated with remote team to deploy custom OS, user accounts and documented the process reducing future on-boarding time by 35%.

Key responsibilities at SCA ltd

- Administered active directory user accounts, adding users to domain and troubleshooting domain related issues.
- Configured and deployed desktop computers, laptops and Printers into the corporate network.

EDUCATION

1. Kibabii University, Bungoma, Kenya Bachelor of Science (Information Technology). December, 2023

- Served as a student leader, school of Computing and Informatics (Academic Year 2022/2023).
- Organized virtual work-readiness training sessions in collaboration with industry partners.

2. Cloud Certified: AWS and Microsoft Azure May, 2022.

- Trained as a cloud Engineer with a focus on cloud architecture, deployment and AI integration.

3. Network Certified: Nokia Network Routing Specialist 1(NRS 1), Optical Network Professional (ONP) September, 2024

- Completed training and certification as a Nokia Routing Specialist (NRS1) & Optical Network Professional (ONP).
- Gained hands-on experience using docker to run Nokia service router (SROS) network appliances in container labs
